bsc is perfect.

JC The bigger focus should not be a new chain or coin, but whom we want to partner and collab with as all project will want to work with ZOO and we need to be selective regarding who we collab with.

Eddie Ibanez

E Jake I totally agree - I'm setting up a call with them you game to hop on? If anything just good intel.

Jake Crypto King

JC What time? Only have about 45 min free before dinner. But have plenty of time later this week. It's a non priority as we r minted, live and trading. If anything it's a down the road possibility. But currently wouldn't make a ton of sense unless needed from the tech side for a reason I'm not understanding.

Congratulations guys and girls, $200mil is a very impressive market cap for a new project. We will still hopefully 10x, but our team created a financial ecosystem valued in the 100s of millions. Everyone should be proud. I'm proud to be part of the team and look forward very much to the next 2 months.

Got out of meet with Coinbase. They'd want to JV a marketing roll out for us to list & we'd have to list with the SEC & do a wrap.

Got me thinking : perhaps there's a deal we can cut with Binance direct. If we're going to be the largest Binance token they're getting free promotion from us already, let's have them pay us for it and stake our liquidity.

Plays to the idea with Pancakeswap let's get them to pay and stake liquidity.

Jake Crypto King

I'll see if my contacts still work at Binance, I've spoken to CZ a few times but we aren't 'close'. They'll likely list and collab with us because of the hype we bring, or we partner with CB for a JV. Either r solid. IMO

Eddie Ibanez

Binance would be cool - I think there's $$ for everyone / risk mitigation here if we do.

Coinbase would take forever like 9mo to be all SEC'd up. But it's there.

Binance short term is much better exposure as 8 months in crypto is an eternity. Plus a listing of that caliber out the gate will add significant notoriety.

Maybe the Pixel characters are minted as follows, based on rarity

first X people to mint X animal/hybrid get the PixelZoo (cool name?) as an NFT

Uncommon - first 50 people
Common - first 40
Rare - 25
Super rare - 15
Epic - 10 people
Legendary - 3 people
Mythical - 1 person

Like this "congrats, you were the 7th person to mint a Bearshark! You've been minted a Bearshark PixelZoo!"

People will be rushing to be first to mint and will be trying trying trying to get the super rare animals. Like some have a 5% chance of spawning. This is where we successfully transition from GAME to Collectible. We'll always be both, but having the collectible side to it with a finite # is the way to be

Idk if I explained that correctly but those little figures are SO collectible and cool

Like I actually love them

And they should be collected

Thu, Aug 26, 6:12 PM

Aaron Jacobson

Yeah the explanation was good. So the PixelZoo NFT comes with the the other NFT, cool. And the capped number of each hybrid PixelZoo is going to have people clamoring to breed new combos and not just the ones that yield the most

100%. That's the collectible portion. We can track that right? Like "first 50 to mint" (on each animal) yeah?

100% selling out regardless, I'm game for whatever method you want to do it to achieve maximum returns. MAYC just did a unique style Dutch auction from 3 eth down and they minted 10k between 2.5 and 3 eth. That's a very high target but we could do it from 5 BNB down (or any # u pick).

> I seen that that's why I mentioned

Jake Crypto King

It was a brilliant way to attain the highest price by mayc. And now the floor is 50% higher than the 3 eth (4.5). So indeed we can do that style sale and run it down from 7 BNB? 5? 3? It'll likely sell out close to whatever place we peg it. And with the # of zoo holders everyone I know plans to buy eggs with zoo.

Logan, I got from Ophir that we dropping from 10 to 7 breeds before an animal is overbred. What do you want the 7 reset periods to be?

It was: 1/2/5/14/30/60/90/180/360/collect&burn

> 1/2/5/15/30/90/365

Aaron Jacobson

If the animal can breed one more time after the 365 Cooldown, that would mean 8x.

Can we take off one more to get down to 7x?

> Take off the 90

👍 thx

The ZOO team made a major error this weekend. They chose to not communicate with the community, mint a new token and airdrop it to whatever wallets they determined fit. This decision came from Eddie and Logan and I had no part in it. 11250 wallets before the airdrop, under 11k after. They chose to blacklist and ban over 200 wallets. I suggest u check to make sure u have the new airdropped token as I was not given it. As a founder, like Logan, Jeff, Eddie and Dani I had purchased a large quantity of tokens. 5+ of my wallets have been blacklisted from the original team buys. 80 billion+ ZOO tokens were confiscated from me today without any communication. This impacts about 200 other individuals as well. These major wallets held 10-25 billion each. 99% of my ZOO was confiscated in today's airdrop which was intentionally hid from the community all weekend.

JC And the airdrop was delayed until today so big wallet holders wouldn't have time to notice before the egg sale. Literally the team rug pulled/ exit scammed their biggest holders (any wallets they determined fit) the day before the token sale.

JC This our our lead admin, we stole all of his tokens too and didn't airdrop new ones. I have half the ZOo team messaging me asking why they didn't receive new tokens to.Eddie **Logan** this needs to be addressed before it leaks on socials

                                                                                    Sec

Yeah i'm in the same boat. I had 1B that's now worth $687

Jake Crypto King

I also lost every single one of my tokens (not airdropped was blacklisted). 80 billion tokens as shown video photographs last night in the founder chat.

I wasn't even given my 80 billion tokens!?! How is it that a founder was rugged on his own project **Logan**

JC ????????

                                                                                    Sec

Jake Crypto King

JC Since last night I've been watching price plummet because of the horrendous decision to freeze trading, scam 300 wallets and rug pull the rest. That info leaks today if YOU as the founder don't fix u intentionally fucking other founders (me), along with half the team, our admins, ANd our main investors who actually own CryptoZoo.com and want to know what to put on it given u just rugged them from 10mil $s.

JC The guys u blacklisted are the biggest crypto influencers, the owner of coin market cap, the owner of cryptozoo.com. Literally people who u stole millions from yesterday have more ammo to come after us than imaginable and u stole millions from them. So rightfully they should be.

I feel it's actually the opposite

Jake Crypto King

JC Coin market cap is going to put a BIg red alert every time someone searches the coin announcing **Logan** rug pulled 300 wallets with the details of the unannounced airdrop and scam. CryptoZoo.com, the twitter and the bit lot are going to highlight dink doink, Jake Broido, and how the current project rugged for $50 million. U realize u robbed 300 people and ur response is "u feel the opposite." What is wrong with u? Does the whole world just tell u yes to your incompetent ideas. Fucking 300 people on crypto on a whim because I decided to play child god of your own project was a REALLY bad idea. I can't believe u didn't have guidance from intelligent people saying this was a miserable idea. U literally destroyed what u spend 7 months building. Even if eggs sell out, social media is going to eat alive the story of fucking the whole community for millions with a chain of evidence that is insane s

JC Logan u stole $40 mil
$s in tokens from me, u stole from 248 other individuals. U are a scam artist, u are a liar, and U betrayed ur own community. U won't take advice from more brilliant minds and like to play god when u aren't. The reality is. U aren't that guy. And every detail from this project is going to get exposed. E Jake. I tried calling you last night. No one scammed anyone & im asking you to cease and desist this nonsense. Many wallets like we told you were included in the paused accounts, read your texts - including mine, friends and other team members and founders. Some of whom are also on this thread.

To threaten lies at 2:49 am right away is immature and deserves no respect. It's also insubordinate to the project.

I have many friends in the same scenario. I ask that you stop this immaturity. Now. If you'd like to hop on a call I welcome it.

Alright that's it. I'm so fucking excited. I'm SO fucking excited. I can't wait to get these eggs out there and finish building our game and release it in 1-2 weeks. During that time, THIS is where we start the marketing. It will make the eggs all the more valuable during the speculation phase and I would be willing to bet these eggs get up to .5 eth on secondary, maybe even more, BEFORE LAUNCH. So then the ultra rare hybrids will be going CRAZYYY
